

To whom it may concern, In regards to the satellite radio revisions you seek. Its a bunch of garbage. You are trying to creat a monopoly which is unconstitutional. Try to go through with it. I'll get every lawyer I can and you will lose. I pay for a service as well of hundreds of thousands of others and you just want to do whatever; will no respect to customers who pay your salary. I think this is a gross action and will do everything in my power to stop it.

Thank you.
